

KITCHEN & BEDROOM FIRE SCENARIO

• Briefing Room

Prepare your trainees for a successful evolution in the enclosed briefing room

• Hand Held Remote Control

Start, stop, and reset sequences from a hand help remote control.

• Generator & Electrical Storage

Compartment with external locking door for generator and accessory storage.

KITCHEN FIRE SCENARIO

• SmartStove SmartProp with Oven & Stove Top Fire Extension

Oven Fire Simulation: An oven fire is simulated and is extinguished when the trainee turns the oven off. If left unchecked, the oven fire spreads to the stove top.

Stove Top Fire Simulation: A Class "B" grease fire is simulated with digital flames and smoke. Trainees must use a laser-driven BullsEye extinguisher properly to put out the flames. If the fire is not extinguished correctly, it spreads to the trash can beside the stove.

• TrashCan SmartProp

The TrashCan SmartProp is designed to simulate a Class "A" fire and can be ignited by fire extension from the stove top. Standing six feet back, trainees must aim and sweep properly inside the top of the trashcan to extinguish the fire.

• Overhead Heaters

Integrated overhead heaters vary in intensity based on the size of the fire.

• BullsEye™ Extinguisher (One Included)

Trainees must utilize a BullsEye laser-driven extinguisher properly to extinguish the flames.

• Smoke Detectors

Residential style smoke detectors sound when the smoke has reached the ceiling.

• Phone with 911 Operator

Residential style smoke detectors sound when the smoke has reached the ceiling.

• Smoke Evacuation

Fans are installed to quickly evacuate smoke between evolutions for efficient throughput of trainees.

BEDROOM FIRE SCENARIO

• Window with Evacuation Escape Ladder

Practice EDITH (Exit Drills In The Home) and perform egress training, directing your trainees to safety utilizing the escape ladder in the bedroom window.

• Heated & Smoking Door

Teach trainees how to feel for heat and seal the door to prevent smoke from entering the room.

KITCHEN & BEDROOM FIRE SCENARIO OPTIONAL ACCESSORIES

• Kitchen Hazard Recognition Package

These additional props combine to provide hazard recognition and educational opportunities:

- Smoking Toaster
- Smoking Outlet
- Chemical Cabinet
- Mounted TV/DVD Player for Safety Videos

• Severe Weather Package

A surround sound system, subwoofers, strobe and flickering light, a weather radio, and a weather emergency video all combine to provide severe weather training. A storm warning alert begins the four weather simulations:

- Hurricane
- Tornado
- Earthquake
- Flood

• Interactive Bedroom Fire Package

- Trash Can SmartProp with Smoke & Sound Effects
- Phone with 911 Operator
- Interactive Smoke Alarm
- Smoking Outlet
- Prewire for Interactive Bedroom Fire Package

• Custom Vinyl Graphics Package

• Heated Doors

Doors can be heated with internal heaters to teach trainees when to enter a room, and when to stay out.

• Additional BullsEye Extinguishers

- 5 lb. BullsEye Extinguisher
- 10 lb. BullsEye Extinguisher
- 20 lb. BullsEye Extinguisher

• Camera System with Wireless Remote Playback*

View the action in all of the training rooms. Streaming video can be displayed on an external TV screen or laptop computer.

KITCHEN & BEDROOM FIRE SCENARIO SPECIFICATIONS

• Finish

White aluminum exterior

• Rims

- Steel Wheels
- Optional Aluminum alloy wheels

• Tires

Size ST225/75R15(D)

• Axels & Brakes

Three 6,100 lb. electric brake torsion axles

• Frame

- Two 6" x 2" tube frame rails
- 16" OC steel cross members
- Heavy duty stabilizing jacks on all four corners
- A-frame hitch with 2 5/16" coupler and safety chains

• Floor

Hardwood laminate in Kitchen and Bedroom

• Side Walls Interior

1 1/4" steel tube, 16" OC

• Doors

- 36" x 80" hinged entrance doors for each training room and briefing area
- Pull-out step

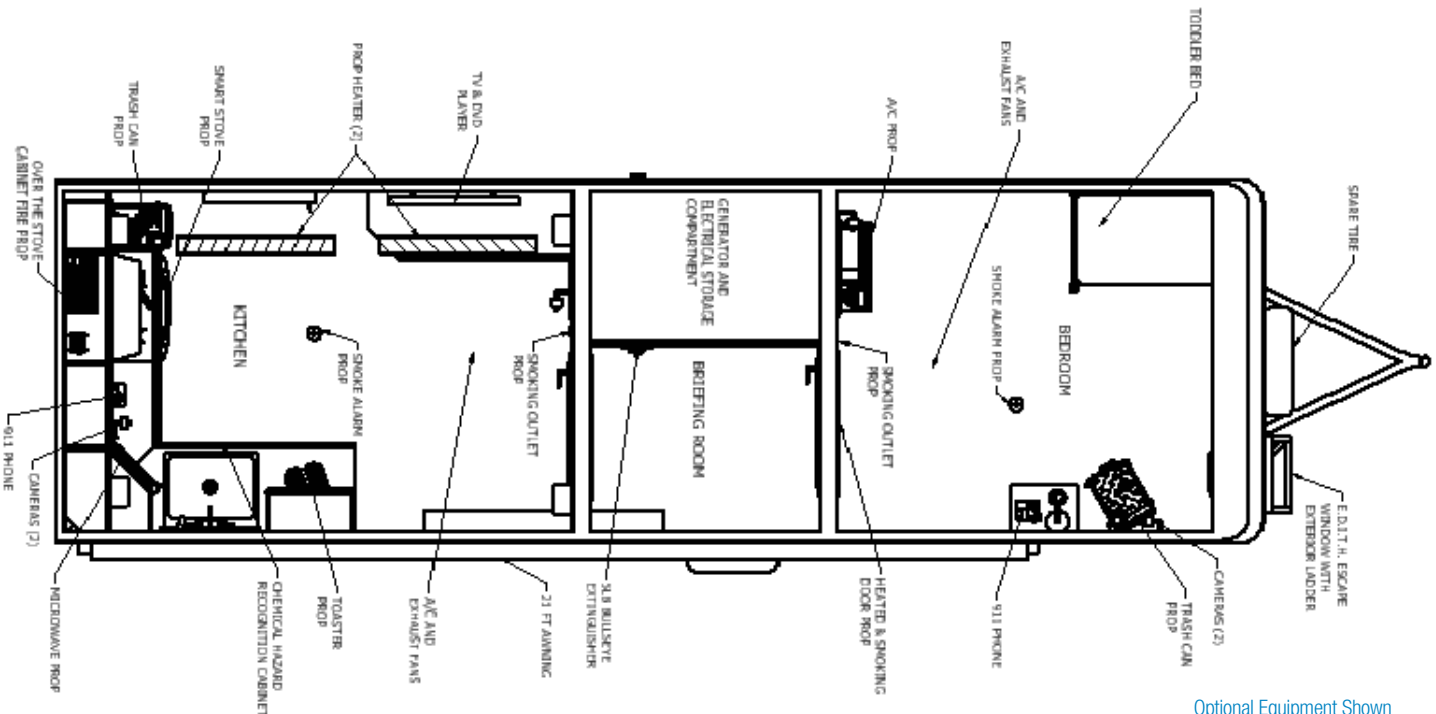

• Electrical

Trailer receptavles: Two NEMA Style 125/250 VAC 50 Amp

• HVAC

- Power exhaust fans above each training room
- Optional Roof-top air conditioning system

*Requires Kitchen Hazard recognition package
