

Advanced structural firefighting glove

PRIMUS™

Tough, reliable structural fire gloves with superior heat resistance and a dynamic 3-D design that provides maximum protection, dexterity and comfort.

FEATURES & BENEFITS INCLUDE:

- The state-of the art 3-D design provides maximum dexterity and comfort with fingertip control, flexibility and grip
- Enhanced gauntlet cuff interfaces easily with your turnouts for greater comfort and quicker donning and doffing
- Heat-resistant, flexible, and durable leather outer shell provides protection against thermal assaults, cuts and sharp objects
- CROSSTECH® insert and Kovenex® lining offer lightweight, flexible, and comfortable liquid and thermal protection
- Sewn-in liner stays easy to don and doff, and won't pull out while doffing – even when wet
- Added Lite-N-Dri™ and innovative knuckle pad on the back of the hand increases thermal and impact protection in high-heat and high-abrasion areas
- Available in sizes XXS to 4XL

(PRODUCT #LPG955)
