

Monday, 9/29/25 - 6pm

Milbank Fire Station

301 E 4th Ave

Milbank, SD 57252

HEN Nozzles

At HEN® Nozzles, we're redefining how water fights fire. Our patented technology, rooted in fluid dynamics and thermal management, isn't just an upgrade—it's a breakthrough. Designed for maximum efficiency and control, HEN® Nozzles empower firefighters with the ability to instantly switch from a solid stream to a wide in-line BLADE™ pattern, all while maintaining thermal balance inside the fire environment.

The fire service has evolved. Your tools should too.

SAM BOOST System

- **SIMPLER:** Manage waterflow from an intuitive smart governor and manage waterflow in hand with the SAM Smart Nozzle.
- **FASTER:** Double the productivity of the first crew, enabling them to more quickly get water on the fire and establish a critical secondary water source.
- **SAFER:** The fire ground becomes safer when the crew can focus on the scene rather than the panel and pressure maintenance.
